

SHX Bubble tube

BJ-ETBS

The tube that works coordinately with the SHX room

Bubble tubes can be used to recreate environments in which colors, vibration, reflections and interactivity open up **endless possibilities** for **visual tracking, motor skills, cause and effect, playing with colors**, etc.

Add the Ball Kit for Bubble Tube to multiply the visual stimuli.

This tube is used in rooms with the SHX System, and offers unlimited control options using any of the SHX elements: choose any color or even change the color of the tube using your voice or depending on the color of the image being projected.

- Dimensions: 180 x 20 cm
- High brightness
- High-quality methacrylate to prevent scratches and maintain transparency
- Compatible with the SHX System.
