

Straight Mirror

BJ-EEGR, BJ-EEPR

High quality for your reflections

The dimensions of this mirror have been designed for use with the square base for the bubble tube. Its curved shape fits well with our concave and convex backrests.

Mirrors boost **mobility, self-awareness** and **joint attention** while they **multiply the stimulation provided** by any visual element. Use it with the corner bases for the bubble tubes.

Special plastic mirrors used for reflecting bubble tube and other multisensory elements.

Their design makes them particularly **safe and durable** under demanding environments.

Multiply the effects of the bubble tubes and other elements with these reflections.

Dimensions:

- Large (height x width): 115 x 110 cm
- Small: (height x width): 115 x 86 cm

Mounting accessories included.

Our mirrors are made with acrylic, reinforced with a wooden panel and the edges are protected to ensure maximum durability and safety

- Material 3mm acrylic mirror.
- Wooden rear panel 8mm.
