

Vibroacoustic Bluetooth Kit

BJ-KVSL

Add sound and vibration to your sessions

Thanks to this kit, you can make the **vibroacoustic elements** you have in your room **vibrate at the rhythm of your preferred music**. For a more immersive experience, you can also **combine the vibration and the sounds with the Luminea devices** of your room, flowing all at the same rhythm.

Pair this kit to any tablet or mobile device through Bluetooth to amplify the music played on your device. The sounds will also turn into a vibroacoustic signal, which will make vibrate your vibroacoustic elements in unison.

By using this kit with any vibroacoustic element from our catalog, such as a vibroacoustic transformable pouf, a vibroacoustic water bed, a vibroacoustic cushion, or others, you can add vibration to the therapeutic sessions for a more intense sensory experience. The user will hear the music but also feel it running through his body.

Use this incredible effect to activate or relax users according to the therapeutic objectives of your session.

Combine it with Luminea's light

Bring your therapeutic sessions to life with Luminea!

If, in addition to a vibro-acoustic element, you **connect one or more** Luminea **light devices**, you will be able to observe how **elements lights up to the rhythm of the music** according to the content you choose in the Luminea App or with the controller you are using at the time.

Add a bubble tube or fiber optic to your vibroacoustic sessions, along with a vibroacoustic furniture element to control light along with sound and vibration.

Bathe in vibrant light!

You can also **use your Luminea vibroacoustic ball pool** so that, in addition to being illuminated and allowing you to change the light as you wish with different controllers, **vibrates to the rhythm of the sound while it lights up** when connected with this amplifier kit.

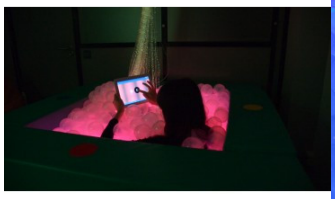

IDEA: Connect the tablet (not included) to the speakers and **use the activities included in the** Luminea App for your sessions (downloadable for free on your tablet, or mobile).

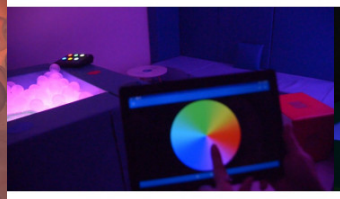

Includes:

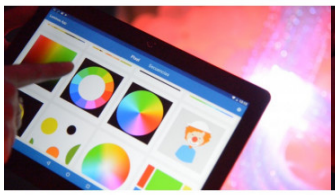

- Powered Speakers
- Pre-amp stage
- Vibro amplifier stage for up to 2 vibroacoustic elements.
- Bluetooth receiver
- Wiring and connection

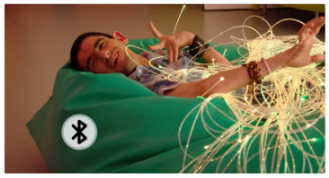

It is necessary to have a vibroacoustic elements or up to 2 elements (not included) to be able to feel the vibroacoustic effect.

It is also necessary to have the Luminea App installed (free) and a Luminea accessory if you want to add light to the session.
